

Gentlemen:

Please be advised that I am 100% against any one entity owning more than one radio or TV broadcasting station or newspaper anywhere in the United States. To allow multiple ownership is to give that entity control over news content and advertising over the public airwaves and in the print media. It has already been demonstrated that such entities will not operate in the public interest, convenience and necessity as the Communications Act once provided. There must be a strict limit to what they can own and control.
